hello world

```java
public class Practice3 {
    public static void main(String[] args) {
        System.out.println("Hello World");
    }
}
```

idea 运行

命令行运行

```
PS C:\Users\21230\IdeaProjects\test\src\main\java> javac Practice3.java
PS C:\Users\21230\IdeaProjects\test\src\main\java> java Practice3
Hello World
PS C:\Users\21230\IdeaProjects\test\src\main\java>
```

理解

在公共类Practice3中定义一个main方法,system.out.println输出hello world
